TECHNOLOGIES

Hydroponics

- Hydroponics is a subset of hydro culture and is a method of growing plants using mineral nutrient solutions, in water, without soil.

Aeroponics

- Aeroponics is the process of growing plants in an air or mist environment without the use of soil or an aggregate medium.

Aquaponics

- Aquaponics is any system that combines conventional aquaculture (raising aquatic animals such as fish) with hydroponics (cultivating plants in water) in a symbiotic environment.

GARDEN MAINTENANCE

We have well trained and skilled team to look after residential and commercial gardens. Our team provides consistent, reliable and cost effective services. The secret of Universal Agriculture's success is our enthusiastic, dedicated team of gardeners, with working knowledge within our market and our commitment to the clients.
